PROFESSIONAL EXPERIENCE

PT NUTECH INTEGRASI, JAKARTA

Pejaten Barat, Jakarta Selatan

Front End Developer (Full Time)

Nov 2024 – Present

- Develop and maintain enterprise web applications for Indonesian state-owned enterprises (SOEs / BUMN), delivering scalable and user-friendly solutions for logistics and transportation management.
- Build responsive front-end features for GLID (POS Indonesia), an end-to-end logistics platform supporting domestic and international shipments, covering customer ordering, vendor assignment, shipment tracking, and internal operational workflows.
- Contribute to the development of SitolLaut, a government sea logistics platform that digitalizes and manages Indonesia's maritime freight operations under the Tol Laut Program.
- Develop dashboard and reporting modules for PT Kereta Api Indonesia (LRT), providing operational insights and supporting station facilities, infrastructure management, and decision-making processes.
- Collaborate closely with UI/UX designers, backend developers, and business stakeholders to translate requirements into high-quality, maintainable front-end solutions.

NOTU TEAM, JAKARTA

Ciputat, Tangerang Selatan

Fullstack Developer (Freelance)

Jul 2023 – Apr 2026

- Designed and developed full-stack applications from concept to deployment, participating in project planning, system architecture design, business requirement analysis, and production release.
- Built custom CMS platforms and integrated business-specific features such as ticket booking, class reservation, document management, approval workflows, and digital archive systems tailored to client requirements.
- Developed scalable frontend and backend solutions while translating complex business processes into secure, maintainable, and user-friendly web applications.
- Delivered projects for organizations and companies including TEDx UIN Jakarta, ExceLEARN, Executrain of Jakarta, IDomain, and Garuda Indonesia Training Center, ensuring reliable deployment and long-term maintainability.

PT JOJO NOMIC INDONESIA, JAKARTA

Cilandak, Jakarta Selatan

OOS Implementor (Full Time)

Feb 2023 – Jul 2023

- Transformed client business processes into integrated systems using Officeless Operating System (OOS), a no-code/low-code platform for enterprise process digitalization.
- Developed systems tailored to client needs, including employee management (attendance, promotion, transfer, recruitment), payroll, and document management (business travel, etc.).
- Collaborated in a cross-functional team with business consultants, implementers, and QA testers.
- Handled implementations for enterprise clients including IFG, Bank Sulteng, and CIMB.

EDUCATION

UNIVERSITAS ISLAM NEGERI SYARIF HIDAYATULLAH, JAKARTA

Ciputat, Tangerang Selatan

Bachelor of Computer Science, Information System

2020 - 2024

- Business Process Model and Notation (BPMN) 2.0, and database management systems

- Experienced in applying these tools to analyze, design, and document complex systems and processes effectively
- Utilized UML for visualizing system architectures, BPMN 2.0 for modeling business processes, and databases for data storage and retrieval
- Capable of integrating these tools into project management methodologies to enhance project planning, execution, and communication
